SKILLS React, JavaScript, Python, jQuery, Redux, TDD, HTML5, CSS3, SQL, Git, Docker, Flask

PROJECTS

!Robinhood (Python, JavaScript, React, Redux, Flask, PostgreSQL, CSS3)

[Live Site](#) | [Github](#)

A Fully interactive app that allows users to buy/sell and monitor the stocks they have purchased

- Developed styling components to closely resemble the real app.
- Integrating an API to display stock information.
- Presenting the stock information using color allowed us to give users immediate information on whether they lost/gained money.

PhotoPickr (JavaScript, React, Python, Redux, PostgreSQL, CSS3)

[Live Site](#) | [Github](#)

A photo-sharing app built using React and Flask

- Set up the project for AWS integration for large scale user base
- Created a clean UI interface to improve ease of use for the user
- Created a theme for the main functionality of the website to have its own use case.

AudioCore (JavaScript, React, Express, PostgreSQL, CSS3)

[Live Site](#) | [Github](#)

A music sharing app built using React and Express

- Users are able to upload music, create their own albums, and leave comments on other user's posts
- Integrating AWS S3 made it possible to store files in the cloud and load them into the react player, which plays throughout the site
- Using React helped me build out the front end of my app with much more control and ease.

SnackOverflow (JavaScript, Pug, CSS3, Express, PostgreSQL)

[Live Site](#) | [Github](#)

A question/answer posting app for all food related questions.

- Functionality consists of users asking questions, writing answers/comments, and up/downvoting both questions and answers.
- Pug allowed us to create a more dynamic frontend while using Javascript to incorporate more functionality.
- Using Express to build the backend server taught me about the structure of our projects and what role each component plays

EXPERIENCE

Airtech Inc.

Rutherford, New Jersey

Mechanical Engineer

January 2019 – February 2019

- Prepared large quantities of ventilator pumps for assembly via a supersonic cleaner with precise quantities of chemical components.
- Met a daily quota to supply the work demand of the other workers.
- Assembled different types of pumps and prepared them for shipment to another facility.

WNYW FOX 5 Good Day New York

New York, New York

Intern

June 2018 – August 2018

- Worked in a very large team every single day to make sure many micro tasks were handled
- Assisted various producers and journalists on the show in both the office and on the field
- Interacted with many celebrity guests in ensuring a comfortable visit and presentation on live television.
